

MAX SERIES CYLINDERS

THE MASTERPIECE OF RAMS

NOW AVAILABLE!

6 STANDARD END OPTIONS

Custom options made to order.

HIGH PERFORMANCE

High quality wear rings and industry leading Hallite seal kits suited to your environment and application - giving you hours & hours of trouble free service.

BUILT TO LAST

The Max range is spec'd with extra heavy wall tubing providing extra protection from dents & scrapes while withstanding high working pressures.

SHAFT OPTIONS

Precision-ground hard chrome plate gives maximum seal life and superior corrosion resistance. Induction hardened chrome bar is available for increase wear & damage protection.

POSITIVE LOCK SYSTEM

The Max high tensile conelock securely retains the piston. Our industry proven positive lock system is known for its ability to remain tight for the life of the ram.

PEACE OF MIND

Heavy wall UN o-ring ports are standard. No fear of over-tightening the ports and causing leak points.

'Specifically designed and thrash tested to succeed in 5000 Psi+ environments'
